

The Birds differs markedly from all the other Comedies of Aristophanes which have come down to us in subject and general conception. It is just an extravaganza pure and simple—a graceful, whimsical theme chosen expressly for the sake of the opportunities it afforded of bright, amusing dialogue, pleasing lyrical interludes, and charming displays of brilliant stage effects and pretty dresses. Unlike other plays of the same Author, there is here apparently no serious political MOTIF underlying the surface burlesque and buffoonery. Some critics, it is true, profess to find in it a reference to the unfortunate Sicilian Expedition, then in progress, and a prophecy of its failure and the political downfall of Alcibiades. But as a matter of fact, the whole thing seems rather an attempt on the dramatists part to relieve the overwrought minds of his fellow-citizens, anxious and discouraged at the unsatisfactory reports from before Syracuse, by a work conceived in a lighter vein than usual and mainly unconnected with contemporary realities. The play was produced in the year 414 B.C., just when success or failure in Sicily hung in the balance, though already the outlook was gloomy, and many circumstances pointed to impending disaster.
