

The Food of the Gods and How it Came to Earth (Large Print): (H G Wells Masterpiece Collection)

There is no doubt about what is not great, no race of men have such obvious littlenesses. They live in a narrow world so far as their human intercourse goes; their researches involve infinite attention and an almost monastic seclusion; and what is left over is not very much. To witness some queer, shy, misshapen, grey-headed, self-important, little discoverer of great discoveries, ridiculously adorned with the wide ribbon of some order of chivalry and holding a reception of his fellow-men, or to read the anguish of Nature at the neglect of science when the angel of the birthday honours passes the Royal Society by, or to listen to one indefatigable lichenologist commenting on the work of another indefatigable lichenologist, such things force one to realise the unfaltering littleness of men.
