

Mazli;: A story of the Swiss valleys,

The present story is the third by Madame Spyri to appear in this series. For many years the author was known almost entirely for her Alpine classic, Heidi. The publication of a second story, Cornelli, during the past year was so favorably received as to assure success for a further venture. Mazli may be pronounced the most natural and one of the most entertaining of Madame Spyri's creations. The atmosphere is created by an old Swiss castle and by the romantic associations of the noble family who lived there. Plot interest is supplied in abundance by the children of the Bergmann family with varying characters and interests. A more charming group of young people and a more wise and affectionate mother would be hard to find. Every figure is individual and true to life, with his or her special virtues and foibles, so that any grown person who picks up the volume will find it a world in miniature and will watch eagerly for the special characteristics of each child to reappear. Naturalness, generosity, and forbearance are shown throughout not by precept but by example. The story is at once entertaining, healthy, and, in the best sense of a word often misused, sweet.
