

The Begums Millions

Volume 18 of 54 of Jules Verne's Extraordinary Voyages, first printed in 1879. After an enormous fortune is haphazardly split between two distant cousins, one French and one German, grand plans are made to make use of the money. The French Dr. Sarrasin plans to build a grand city devoted to the pursuit of science. The German Professor Schultzs designs are to destroy Dr. Sarrasins endeavors, simply because they issue from a Frenchman. This adventures is often called the first story involving the use of chemical weapons, and a compelling prediction of German global ambition. This particular edition is reproduced from English-edition public works, and is presented simply with an emphasis on straightforward presentation, attractiveness and continuity of appearance, with each title in the Extraordinary Voyages sporting a journal-style brown cover accompanied by a cover illustration and quote from the text on the back cover.
